- Alternative use as a scrambling net for persons able to climb to safety

making a  
**safer** work  
environment

3 year  
guarantee

# DACON *FISHERMAN* RESCUE FRAME

- man overboard recovery system

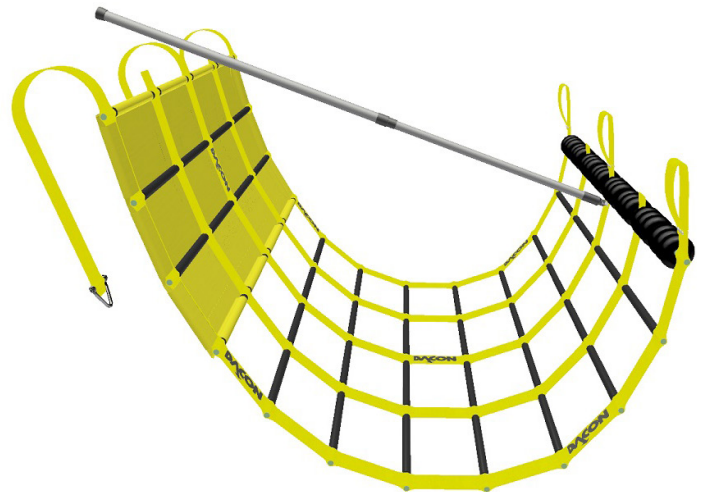

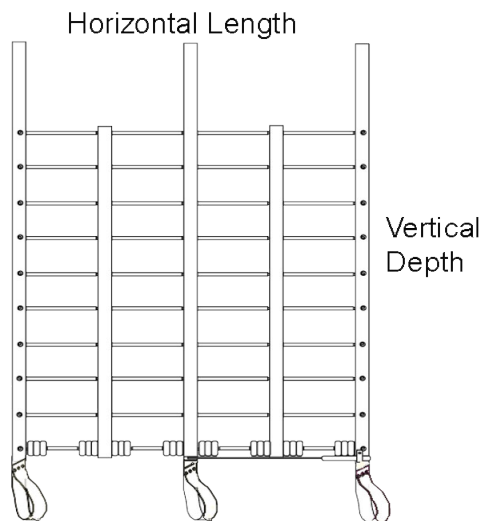

## USE

When deployed, the Rescue Frame hangs down, forming a cradle in the water. Position the casualty in the cradle and gently bring on board by pulling the rescue frame or the retrieval lines.

## DESIGN

The Dacon Rescue Frame consists of a number of parallel fibre glass rods, connected by slotted webbing. The outer bar is fitted with pebble buoys, a maneuvering stick and hand-loops for easy grip.

## SPECIFICATIONS

Frame dimensions: 1,5/2,7 m

Weight: 16 kgs

## MATERIALS

Rods: Fiberglass

Webbing: Polyester

Fittings: Stainless steel

Rope: Polyester
